

# OPTIMISE YOUR MACHINE, SAVE ENERGY: THOMSON PC-SERIES™!

Making the change from pneumatic cylinders to electric actuators can simplify your design and deliver savings at the same time. The new Thomson PC-Series electric actuators are designed to deliver superior performance while saving you time and money with easy product sizing and selection, quick and reliable installation, and reduced maintenance.

#### Superior Performance:

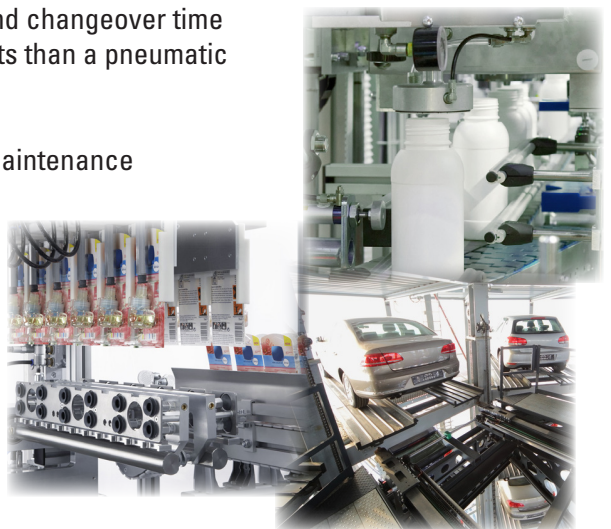

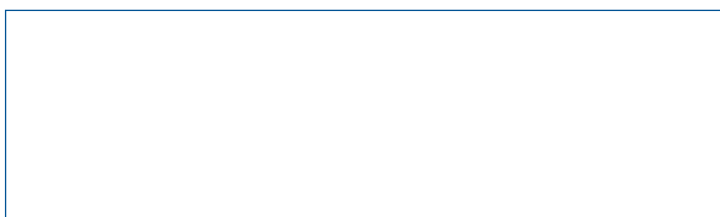

- Higher power density
- More accuracy
- Longer stroke lengths up to 1200 mm
- Loads up to 6000 N
- Quieter operation
- Side load capability

#### Time and Energy Savings:

- Reduced energy costs
- Reduced setup and changeover time
- Fewer components than a pneumatic system
- No air leaks
- No compressor maintenance

New Thomson PC-Series actuators are a perfect fit for **processing applications** and also for **packaging and handling processes** as well as many others.
